University Learning Management System (ULMS)

Welcome to the University Learning Management System (ULMS) app!

Project Structure

```
- ULMS
  |-- images
      |-- project_pictures
  |-- node_modules
  |-- views
  |-- app.js
  |-- package.json
  |-- ULMS.db
```

Getting Started

To run the ULMS app locally, follow these steps:

Prerequisites

- Node.js installed on your machine.
- npm (Node Package Manager) is included with Node.js.

Installation

1. Unzip the app to your local machine:

   ```
   unzip ULMS.zip
   ```

2. Navigate to the project directory:

   ```
   cd ULMS
   ```

3. Install the project dependencies:

   ```
   npm install
   ```

Running the App

Use the following command to start the ULMS app:

```
node app.js
```

The app will be running on http://localhost:3000. Open your web browser and navigate to this URL to access the ULMS application.

Additional Information

Database

The ULMS app uses the `ULMS.db` file as its SQLite database. Ensure that the database file is present and properly configured for the application to function correctly.

Project Pages

The ULMS app contains multiple pages all stored in a directory `views` in there you will find all the pages. Ex: home, profile, login pages.
